

Dynea – just what you need

As a world-leading provider of high value adhesion and surfacing solutions for the wood-working industry and a wide variety of other industrial applications, Dynea offers customer solutions through advanced resin technology, process innovations and on-going research.

Headquartered in Finland – world-renowned for its forest industries – Dynea is in a unique position to serve both local as well as large global accounts from forty production units strategically located in 22 countries in Europe, South America and the Asia Pacific region. Dynea employs some 2,200 employees and had revenues of EUR 879 million in 2008.

Dynea serves its customers with a complete range of resins, adhesives and hardeners. These are used in a variety of applications by the panel board industry, furniture, flooring and engineered wood manufacturers, the paper impregnation industry and many others. Dynea also produces high quality phenolic surface films for industrial applications. Dynea provides technical service, application testing and advice on a range of subjects from mixing and application to environmental issues.

Dynea works together with its customers to create the ideal balance of technology and service to meet such customer requirements as optimising production capacity, achieving desired bond quality, as well as utilising different wood species.
