Key features of AsWood™ solutions:

- **AsWood™** solutions facilitate emission levels on the level found in natural untreated wood
- **AsWood™** solutions are with respect to usage and performance comparable to traditional systems
- **AsWood™** solutions meet all current and projected emission requirements globally
- **AsWood™** solutions provide excellent mechanical strength, bond strength and water resistance
- **AsWood™** solutions are tailored to solve individual production and market challenges faced by each customer
- **AsWood™** solutions are for healthier living

Range of typical emission levels and requirements
